Contents of Volume 26

Interfacial areas and gas hold-ups in bubble columns and packed bubble columns at elevated pressures 1
M. H. Oyevaar, T. de la Rie, C. L. van der Sluijs and K. R. Westerterp (Enschede, The Netherlands)

Bubble dynamics and scale formation during boiling of aqueous calcium sulphate solutions. 15
M. Jamialahmadi, R. Blöchl and H. Müller-Steinhagen (Auckland, New Zealand)

Characterization of product qualities and its application in drying process development 27
W. Bühler and W. Liedy (Ludwigshafen/Rhein, F.R.G.)

Diffusion in porous materials partially wetted with a binary mixture. 35
J. Schwarzbach (Karlsruhe, F.R.G.)

Analysis of the structure of steady-state solutions for a porous catalyst pellet.
Part I. Determination of parameter regions with different bifurcation diagrams. 45
A. Burghardt and M. Berezowski (Gliwice, Poland)

Transport of mass and heat in porous adsorbents. 59
L. Riekert (Karlsruhe, F.R.G.)

Continuous lumping of nonlinear chemical kinetics 63
R. Aris (Minneapolis, MN, U.S.A.) and G. Astarita (Naples, Italy)

Measurement of diffusivity, viscosity, density and refractivity of eight binary liquid mixtures 71
W.-M. Melzer, W. Baldauf and H. Knapp (Berlin, F.R.G.)

Energy savings through heat integration of continuous tank reactors into heat recovery systems. 81
A. Al-Saggaf and D. Mewes (Hanover, F.R.G.)

Potassium sulphate precipitation from aqueous solution by salting-out with acetone 93
J. W. Mullin, N. Teodossiev and O. Söhnel (London, U.K.)

Hydrodynamics in bubble columns. 101
H.-E. Gasche, Ch. Edinger, H. Kömpel and H. Hofmann (Erlangen, F.R.G.)

Local solid–liquid mass transfer coefficients in a three-phase fixed bed reactor. 111
G. Bartelmus (Gliwice, Poland)

Influence of pore diameter distribution on the determination of effective diffusivity in porous particles 121
C. L. Cui, D. Schweich and J. Villermaux (Nancy, France)

The influence of unevenness of the wool mat on the drying of loose wool 127
R. B. Keey (Christchurch, New Zealand) and Wu Yuan (Wuhan, China)

Simulation of fluidized bed drying of biosynthesis products 139
C. Strumiłło, S. Grabowski, W. Kamiński and I. Zbiciński (Lódź, Poland)

Diagnostics of gas–liquid flow patterns in chemical engineering systems 147
J. Drahoš and J. Čermák (Prague, Czechoslovakia)

Liquid-phase mixing model for hydrodynamics of bubble columns 165
U. Rustemeyer, J. Pauli, Th. Menzel, R. Buchholz and U. Onken (Dortmund, F.R.G.)

Heat transfer in an annulus with rotating inner cylinder 173
K. V. Chalapathi Rao and V. M. K. Sastri (Madras, India)

Fabric cleaning in pulse-jet filters 179
J. Sievert (Birmingham, MI, U.S.A.), and F. Löffler (Karlsruhe, F.R.G.)

Review of applications of various types of uncertainty in chemical engineering 185
A. Krasławski (Lódź, Poland)

Theoretical and experimental investigations into local granulate mixing mechanisms 193
H. Buggisch and G. Löffelmann (Karlsruhe, F.R.G.)

The role of minute droplets in the separation of aerosols from gases 201
J. M. Chawla (Ettlingen, F.R.G.)

Enhancement of the efficiency of countercurrent near-critical fluid extraction by pressure pulsation. 207
U. Ender and S. Peter (Erlangen, F.R.G.)

The formation of cobalt(II) dithizonate in a liquid/liquid system: a kinetic comparison between an interfacial and a homogeneous reaction pathway 215
W. Nitsch and A. von Imhof (Garching, F.R.G.)

 ©Elsevier Sequoia/Printed in The Netherlands

Vacuum contact drying of mechanically agitated, coarse, hygroscopic bulk material. 225
R. Forbert and F. Heimann (Karlsruhe, F.R.G.)

Transport properties of porous media from the microgeometry of a three-dimensional Voronoi network 237
N. A. Vrettos, H. Imakoma and M. Okazaki (Kyoto, Japan)

Prediction of the breakthrough curve of a packed bed adsorber used for treatment of unknown multi-solute wastewater 247
M. Okazaki, H. Kage, M. Kusuoka, J. Tsubota and R. Toei (Kyoto, Japan)

Thermal diffusivities determined by photoacoustic spectroscopy 257
K. Stephan, V. Rothacker and W. Hurdelbrink (Stuttgart, F.R.G.)

Packed bed thermal dispersion models and consistent sets of coefficients 263
D. Vortmeyer (Munich, F.R.G.)

A theoretical structure and correlating equation for the motion of single bubbles 269
S. W. Churchill (Philadelphia, PA, U.S.A.)
